Heart Care

Daily: 9 a.m. to 7 p.m.

Heart disease is the number one killer in the United States. And the fact is, many of those deaths could have been prevented if people would have known the heart attack warning signs. Heart health awareness and education is particularly important for Kentuckians. Kentucky ranks ninth in the nation for deaths from heart disease and stroke. The internationally renowned team of experts at Jewish Heart Care will be on hand at the Kentucky State Fair to share information about heart health. KentuckyOne Health will offer free cholesterol and glucose screenings from 9 a.m. -1:30 p.m. each day and free blood pressure screenings from 9 a.m. to 7 p.m. every day at the Kentucky State Fair, August 15-26. The exhibit will also feature a large inflatable heart that visitors can walk through and learn the anatomy of the organ and cardiovascular care.

Breast Cancer Screenings at the Kentucky State Fair

Daily: 9 a.m. - 5 p.m.

In 1990, the James Graham Brown Cancer Center began offering mammograms at the Kentucky State Fair to raise awareness and improve access to quality breast care. Mammograms will take place every day of the state fair from 9 a.m. to 5 p.m., and will be performed by technicians from the Brown Cancer Center's Breast Care Center, the first nationally accredited breast center in Kentucky. Please be sure to bring your Medicare or commercial insurance card. Those without insurance should speak to staff members on site for additional information. With insurance, the mammography will cost \$79 and can be paid for by cash, check or credit card.

Bariatric Surgery Information

Daily: 9 a.m. to 5 p.m.

When you just can't seem to lose the weight that's causing you serious health problems, LAP-BAND® surgery can be the step that helps you finally succeed. For people suffering from severe obesity and related health conditions, weight-loss surgery may be a solution. The LAP-Band® System is safer, less invasive, and more effective than other types of weight-loss surgery. Jewish Bariatric Care works with patients on a multi-disciplinary weight-loss program, which includes nutritional, emotional and exercise counseling, before and after surgery to ensure success and long-term health. Meet the team at the Kentucky State Fair in the Health Horizons area in the South Wing.

Depression and Anxiety Screenings and Information

Daily: 9 a.m. to 4 p.m.

Our Lady of Peace is a private, non-profit psychiatric hospital that offers the most comprehensive array of psychiatric treatment services in the state, including specialized programs and services along the full continuum of care, including inpatient, partial hospitalization and intensive outpatient programming for all ages, including children, adolescents, adults and seniors. Visit the Our Lady of Peace team at the State Fair to learn about depression and anxiety and what can be done to treat these conditions. Depression and anxiety screenings will also be available.

Oral, Head and Neck Cancer Screenings

Friday, August 16, 10 a.m. - 4 p.m.

Kentucky is a state steeped in traditions—horseracing, college sports and beautiful natural resources. Tobacco use has also been a tradition throughout the Commonwealth, and one that together we must bring to an end. We lead the nation in tobacco-related cancers and in the

percentage of adults who smoke or use tobacco products. That tradition has led to a lung cancer death rate that is 45 percent higher in Kentucky than the nation.

The James Graham Brown Cancer Center will offer FREE oral, head and neck cancer screenings, from the same team that performed Kentucky's first daVinci TransOral Robotic Surgery. The innovative surgery allows access to cancerous tissue through the mouth, making the surgery virtually incision free. It opens new possibilities in treating throat cancer with less scarring and better outcomes. As with all cancers, early detection increases treatment options.

Walk with a Doc

Friday, August 16, 10 a.m. – 12 p.m., Friday, August 23, 10 a.m. – 12 p.m.

Meet the doc, Dr. Jesse Adams, who hosts the monthly Walk with a Doc Program. Walk with a Doc is a nationwide program that works to empower patients to improve their health through physical activity, exercising side-by-side with their healthcare providers. Walkers have the opportunity to learn about important health topics, ask medical questions in an informal manner and receive free blood pressure screenings, refreshments and giveaways.

Stroke and Neurological Care

Tuesday, August 20: 9 a.m. – 7 p.m.

University of Louisville Hospital is the first certified Comprehensive Stroke Center in Kentucky and was the 20th in the nation. Achieving Comprehensive Stroke Center certification recognizes University Hospital's commitment to providing the best possible stroke care and the Stroke Center's ability to treat all levels of patients. In addition to providing the most advanced treatments, University Hospital's Stroke Center is focused on educating the community on stroke risk factors and symptoms so future strokes can be prevented. Stroke screenings will include FREE daily blood pressure screenings, as well as information on other risk factors.

Comprehensive Epilepsy Center

Tuesday, August 20, 10 a.m. – 4 p.m.

Epilepsy is the third most common neurological disorder in the United States after Alzheimer's disease and stroke. In Kentucky and Southern Indiana alone, over 90,000 people have epilepsy. Due to the high number, there is a vital need for a comprehensive epilepsy team, making the University of Louisville Hospital Epilepsy Center a critical resource for the community and state. As a Level IV epilepsy center, the highest accreditation, the team has the expertise and resources to effectively diagnose and treat patients, as well as to perform brain surgery when necessary. Talk to these specially trained epilepsy nurses, learn about the disorder, warning signs and treatments available.

Trauma Prevention

Tuesday, August 20: 9 a.m. – 5 p.m.

Meet the University of Louisville Hospital Trauma Team and learn about their expertise in preventing traumas, regardless of whether they are at work, exercising, staying active or staying at home. ULH is home to the nation's first trauma center, founded in 1910 when forward thinking physicians first aligned all the resources needed to meet lifesaving needs when it matters most.

Frazier Rehab Institute

Thursday, August 22, 9 a.m. – 5 p.m.

Comprehensive rehabilitation services are offered by KentuckyOne Health through Frazier Rehab Institute. Providing therapy in an acute care setting for inpatient and outpatient rehab needs, Frazier offers a number of specialties focused on helping individuals reach a higher quality of life including physical, occupational, speech-language and recreational therapies, as well as pulmonary rehab, rehab nursing and psychology/neuropsychology. Meet the Frazier Rehab team to learn more about the innovative treatments offered right here in Louisville.

KentuckyOne Health Sports Medicine

Thursday, August 22, 9 a.m. – 1 p.m.

Meet the team from KentuckyOne Health Sports Medicine, the leaders in sports medicine. KentuckyOne Health Sports Medicine offers a comprehensive range of services including education, prevention, treatment, rehabilitation and wellness from a specially trained and certified staff, ensuring the highest quality of care possible. Certified Athletic Trainers and other professionals in the area of sports medicine provide a holistic approach to the athlete, no matter the level of competition, keeping people in the game of life by helping them understand the need for education and preventative measures, for the entire individual-physically and mentally. Sports injury screenings will be performed by licensed physical therapists and will address questions about injury prevention, proper footwear, training regiment, overuse injuries and more.

Burn Awareness

Thursday, August 22 and Saturday, August 24, 10:00 a.m. - 2:00 p.m.

The University of Louisville Hospital Burn Unit is a critical resource. It is the only unit dedicated to adult burns in the region and treats between 250 and 300 patients each year. While the expertise of the burn unit has resulted in some miracle recoveries, this outreach mission is about prevention. Come talk to the nurses, specially trained about burns, to learn about prevention, immediate steps to take after a burn and when to seek medical attention.
